FIRMWARE RELEASE NOTE

DS-KB8112-IM Vandal Resistant Doorbell
V.1.4.62 Build 180917 Release Notes

Device Model: DS-KB8112-IM	Firmware Version:	V1.4.5 Build 180917
	Client version	V.2.7.1.9 Build 20180604

Reason of Upgrade

Added or modified functions, enhance products quality and meet customers' requirements

New Features

1. Supported English, Spanish, Portuguese, Italian, French, German and Hungarian languages.
Language can be set in iVMS-4200 remote configuration->System->System Maintenance.

2. Compatible with 1.5.0 firmware indoor stations.

3. Supports direct connection to Hik-Connect mobile app:
If there is no verification or QR code on the back of the device you can add it manually by typing the serial number and ABCDEF as a verification code.

- Supports adjusting microphone and speaker volume
- Supports enabling alarm notification when motion is detected
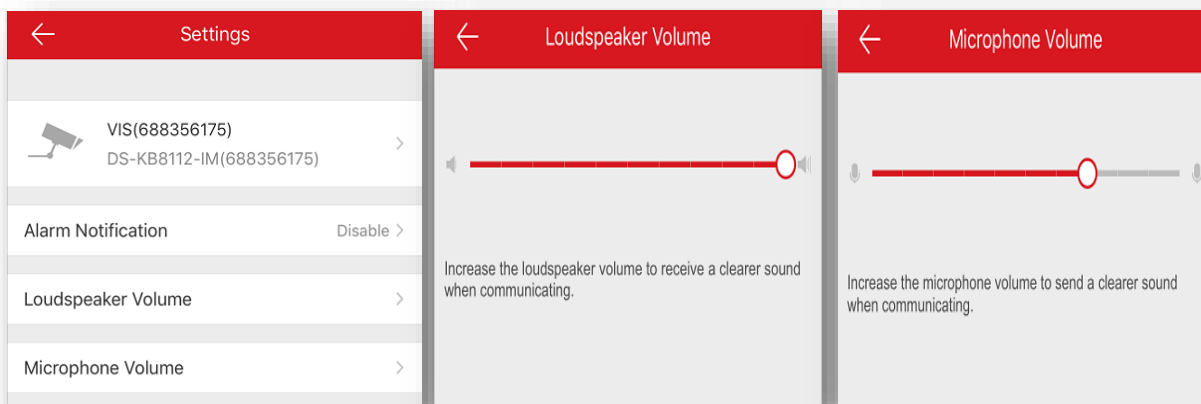

4. Supports calling iVMS-4200 directly.

Just add the device in iVMS and press the call button.

5. Supports calling Master station directly.

Enter the master station IP address *Remote configuration->Network->Linked network devices->SIP server.* To see the door station in the master station add it in *Remote configuration->Intercom->IP camera information* as a door station.

6. Supports calling indoor station directly.

Just add the door station IP address in *Remote configuration->Network->Linked Network Devices->(Main) Door Station* of the indoor station.

7. Supports simultaneous call of all linked devices.

When the call button is short pressed all linked devices including hik-Connect, iVMS-4200, indoor station and master station will ring simultaneously. If any of them pick up the rest will stop ringing.

8. Supports Lock mode and Chime mode for the relay output.

Mode 1 is for controlling door lock and mode 2 is for controlling a chime. In mode 2 when call button is pressed the relay will trigger 3 times. For mode 2 go to Remote Configuration->Intercom->IO Input/output and select Custom.

Improvements

1. When added to Hik-Connect app only 1 video channel will be visible instead of 4.

2. By default SMTP email address is empty.

3. Translation modifications on web:

Remote Config->Intercom->IO input/output->Custom to Chime,
Remote Config->Intercom->Supplement Light Settings->Working Mode to On at night mode and on in a call

4. If the call button is pressed several times during the first 4 seconds the call will not be canceled.

Bug Fixes

1. Fixed prompt voice when call when indoor station/master station/4200 are busy.

Customer Impact and Recommended Action

This new firmware upgrade is to improve product performance, and will take effect automatically after upgrading from previous versions. We'd like to inform you for the above changes. Also, we are sorry for any possible inconvenience of use-habit changes caused by this action.

For questions or concerns, please contact our local technical support team.
